-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Remarks

1. The applicant has amended the claims and with the amendment has overcome the 112 rejection set forth in the previous office action.

Claim Objections

2. Claims 3-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Svean et al. (US 7,039,195) in view of Hardman (US 4,651,777).

Regarding claim 1, Svean discloses an earplug comprising:

a plug member for blocking a person's ear canal, said plug member comprising at least one acoustic channel for channeling incoming acoustic energy into said person's ear (implicit since this is an earplug; Figure 1);

a detector for detecting an acoustic energy level or for detecting a control signal that is indicative of an acoustic energy level to be received; (M1, Figure 1; see abstract; column 4, line 24-36);

an acoustic valve (V, Figure 1) positioned in the acoustic channel.

Svean fails to teach that a control unit that, in response to an acoustic level sensed by said detector, controls actuation of said acoustic valve between a pass-through position with a low attenuation and an attenuating position.

The concept of a valve being actuated by a control unit is taught by Hardman (see abstract; column 4, lines 52-64).

The examiner asserts that even though Hardman is a different field, that know work in one field of endeavor can prompt variations of it for use in another field. The modification of Svean by using a control to actuate the valve would therefore be reasonable to one skilled in the art.

All elements of claim 2 are comprehended by the rejection of claim 1

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DEVONA E. FAULK whose telephone number is (571)272-7515. The examiner can normally be reached on 8 am - 5 pm.
